FACTS

SEEK TRUTH FROM FACTS

FACTS

Seek Truth From Facts

FACTS is a collective of progressive Black people, from varying backgrounds and social experiences, dedicated to community oriented political educational programs. As we strive to advance our program for a new society overall, our focus is on the theory and practice necessary to eliminate racism, economic exploitation, and gender discrimination. We are concerned about the impact of these problems on our families and communities.

We share many views about the nature of society, its basic problems, their causes, and the solutions to them. We are individually and collectively committed to heightening our consciousness through systematic study and ongoing struggle. It is through study that we can advance the struggle to bring social change.

Our purpose is to seek truth from FACTS.
